

PORTFOLIO SYSTEMS, INC. ANNOUNCES PORTFOLIO DIRECTOR WEB ENHANCEMENTS

HOLIDAYSBURG, PENNSYLVANIA – June 20, 2007 - Portfolio Systems, Inc., (PSI) a leading provider of investment management technology products, today announced it has released version 8.17 of its Portfolio Director Web product. This is the company's third major product announcement this year following the release of Portfolio Director Web in March.

This newest release allows online customization by the advisor such as editing investment classifications, account names, and client demographic information. Customers now have the ability to quickly and easily create online reports.

Bob Yacobucci, founder and President of the investment technology firm stated, "These modifications emphasize our commitment to expand the Portfolio Director Web product. We're also committed to keeping the platform easy to use with the main emphasis on generating professional client reports."

Portfolio Systems, Inc. offers two solutions for the professional investment advisor. Portfolio Director Web is designed for web based reporting and Portfolio Director Desktop for application based reporting.
